

Modules

- Ultra high-density
- More channels
- Less SWaP
- Function-specific
- **70+** module building blocks

- Dedicated processing & signal analysis
- More programmability
- Eliminates SBC I/O processing overhead

Input / Output

Measurement/Simulation

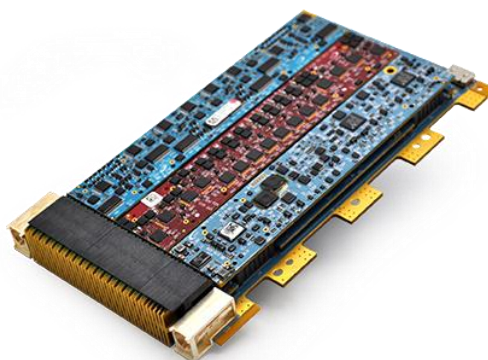

Communications

Over 70 Function Modules Available

Modules have programmable channels, Built-in Test, ARM processor and FPGA to offload the System Processor

68G5 Support for three independent, smart function modules

68PW1 Single-axis PWM servo motor drive

3U VPX Development Chassis - Optional conduction-cooled module card guides
