

Flexible • Adaptable • Configurable • Modular • Expandable

## Modular Open Systems Approach (MOSA) Solutions

NAI's Modular Open Systems Approach (MOSA) solutions provide customers with pre-configured, pre-validated, rugged embedded solutions that save development time and cost while reducing program risk.

These Flexible, Adaptable, Configurable, Modular and Expandable Systems Eliminate custom designs and redesigns by taking advantage of NAI's Configurable Open Systems Architecture (COSA).

### New MOSA Aligned Application Ready Solutions

[Actuator Interface Units \(AIU\)](#)

[Data Concentrator Units \(DCU\)](#)

[Flight Control Computers \(FCC\)](#)

[Mission Computers \(MC\)](#)

[Remote Interface Units \(RIU\)](#)
